## Product Specification Tolyltriazole CAS No. : 29385-43-1

|                        |  |
|------------------------|--|
| <b>Chemical name :</b> | Tolyltriazole                              |
| <b>chemical name :</b> | 4(or5)-methyl-1H-1,2,3-benzotriazole       |
| <b>Appearance :</b>    | white to yellowish granules                |
| <b>assay :</b>         | min. 99,0 %                                |
| <b>other :</b>         | Ash: max. 0,05 %                           |
| <b>Moisture :</b>      | max. 0,5 %                                 |
| <b>Density :</b>       | 1,26 bei 20 °C.                            |
| <b>Packing :</b>       | bags, bigbags, drums, customized packaging |

**Einecs :** 249-596-6

**CAS No. :** 29385-43-1

**WGK :** 2

**Other :** melting point: 85 +/- 2 ° C,  
pH value: 5 - 6,5

**Synonym :** 4(or5)-methyl-1H-1,2,3-benzotriazole, SysKem TT 1000, TTA granulate

**General informations :** We fill tolyltriazole for our clients in customized packaging. From 1 kg to 1000 kg, everything is possible.

Simplify your processes: Let us mix tolyltriazole for you with other components according to your formulations and fill it into packaging specified by you.

In order to guarantee short-term and reliable delivery of tolyltriazole, we have agreed minimum quantities with our customers, which we keep in stock. We would be glad to do this for you too.

The quality of tolyltriazole is regularly tested in our laboratory.

**Application :** Tolyltriazole is used as a corrosion inhibitor in various metalworking fluids. It protects the metal surface from corrosion and oxidation.

Tolyltriazole is used in copper processing to protect copper surfaces from corrosion and oxidation. It is often used in copper cleaning and degreasing agents.

Tolyltriazole is used in coatings, paints and lacquers to provide corrosion protection and improve coating durability.

Tolyltriazole is used in water treatment to prevent corrosion and deposits in water systems.

**Label :** GHS07,  
GHS08,  
GHS09
